M0
RGB + robot state
RGB ResNet18: layer2
ResNet18 layer3/4
512 features per camera
global_cond + state
original ConditionalUnet1D / FiLM
M1
RGB + robot state
layer2 + gamma * GSA(RGB features, Depth)
ResNet18 layer3/4
512 features per camera
global_cond + state
original ConditionalUnet1D / FiLM
M2
RGB + robot state
same GSA + 8 TokenLearner weights
ResNet18 layer3/4
512 features per camera
global_cond + state
original ConditionalUnet1D / FiLM
M2: same spatial weights -> visual tokens + (u,v,d,rho) -> projection -> residual to global visual features
